Introduction

Welcome to the iThenticate User Manual. iThenticate provides plagiarism prevention services to publishers, corporations, law firms and other professional establishments around the world.

This user guide provides a thorough explanation about iThenticate from its features to a comprehensive walkthrough about its use. Account administrators have the ability to manage users within an account, click [here](#) to view the Administrator Manual.

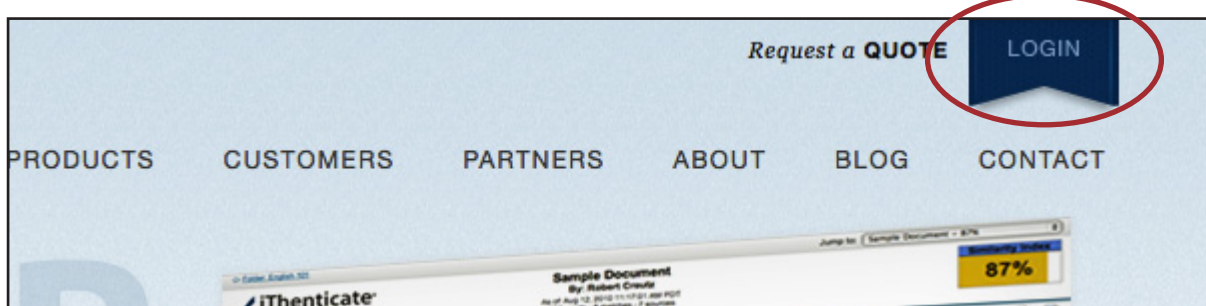

New Users

First time users will receive an email from their iThenticate sales representative with a username and a one-time password. The username you receive will be the email address you provided to your iThenticate sales representative. You may only log in once with the one-time password and you will need to change it the first time you log in. For information on how account administrators add users to an account, please click [here](#).

Logging In

Once iThenticate has been purchased and you have received an email from your iThenticate sales representative containing your username and password, then you can login to iThenticate.

To login to iThenticate first click on the *Login* button at www.iThenticate.com.

Insert the username and the password into the appropriate fields and click the *Log In* button.

A screenshot of the iThenticate login form. It features a 'Log In' heading, a link for users without an account ('Sign Up here'), and input fields for 'Email' and 'Password'. There is a checkbox for 'Remember me for 1 week' and a 'Log In' button circled in red. A link for 'Forgot your password?' is also present.

Once logged in, the user will see the iThenticate homepage.

Resetting Your Password

If the iThenticate user password is forgotten, the password can be reset via a secret question or e-mail. To reset a password via e-mail, the user information must contain a valid e-mail address. iThenticate cannot send a password reset information to any other e-mail address.

E-mail password reset:	
1. Go to www.iThenticate.com	
2. Click on <i>Forgot your password?</i> to the right of the <i>Log In</i> button	
3. Enter your email address and then click the <i>Send</i> button. iThenticate will send you a one-time password to your email. You may only log in once with this password and you will need to change it the first time you log in.	
4. Click the <i>Send</i> button	

Changing Your Password or Username

A user may change their iThenticate password or username (email address) at any time by opening the *Account Info* page, once they have logged into iThenticate.

Changing your password	
1. Log into iThenticate by entering the username and password for the iThenticate account and click the <i>Log In</i> button	
2. Click on <i>Account Info</i> at the top of the iThenticate homepage	
3. In the Account Info page, the user must first enter their current password in the <i>Current Password:</i> field	
4. Now enter the new password for your account within the <i>Change Password:</i> field	
5. Reenter the password within the <i>Confirm Password:</i> field to ensure that the password has been entered correctly	
6. To save the changes to the password, click on the <i>Update Profile</i> button below the user information form or click <i>Cancel</i> to cancel the change to the password	

 **Note:** Once you click on the *Update Profile* button, your password will be changed and the new password will now be used to log in to iThenticate.

<p>Changing your email</p>	
<p>1. Log into iThenticate by entering your email and password for the iThenticate account and click <i>Log In</i></p>	
<p>2. Click on <i>Account Info</i> at the top of the iThenticate homepage</p>	
<p>3. Delete the previous e-mail and enter the new e-mail into the <i>E-Mail (Account ID):</i> field</p>	
<p>4. To save the changes, click on the <i>Update Profile</i> button below the user information form or click <i>Cancel</i> to cancel the changes made to the username</p>	

The iThenticate Account Homepage

This section will walk through the different areas of the iThenticate account homepage.

Main Navigation

After logging in, the iThenticate user will see the Folder page. The main navigation bar at the top of the screen has three to four tabs based on the user type. These different tabs are:

- **Folders:** This page contains all the functionality of iThenticate, it is where folders are created, browsed and shared with other users, where documents are submitted within a folder to be checked against the iThenticate database for similarity, and where documents can be deleted or moved from one folder to another
- **Settings:** The settings page controls general, document and report display options. These options range from the number of documents shown for each page, Default Report View, to controlling Email Notifications and much more
- **Account Info:** The Account Information page contains the user profile and the account usage
- **Manage Users:** The Manage Users page lists all users that have access to your iThenticate account. This page is where new users can be added to an account and where activation emails can be sent or where users can be deleted or deactivated from an account. The Manage Users page is also where reporting groups are created, where usage statistics can be viewed, and where the document sharing options are located. *This tab only appears if the user is an Account Administrator*

The Toolbar

The toolbar changes functionality based on what the main content is displaying. For example the toolbar displays the *Search*, *Trash*, and *Move* functions when the user is browsing documents from within a folder. The toolbar is only functional when the user is within the Folders page.

Directory

The directory displays all created folders and the Trash. To enter folders, just click on the folder you would like to browse. Clicking on the Trash opens the Trash, displaying all deleted documents. To permanently delete items from the Trash, click within the check box to the left of the document title and click on the delete button on the Toolbar.

Main Content

The Main content displays the various functional pages within iThenticate.

Content Tabs

The content tabs change depending on what the main content for each page is. For example the content tabs for a specific folder within a folder group are: Documents, Sharing, and Settings. Clicking on each tab opens up a new page displaying the information the tab contains.

Info/Action Column

The Info/Action Column contains easy access to iThenticate actions and information. The only pages that have action functionality are the Folders page and Manage Users page. For example in the Manage Users page the Info/Action Column contains the action *Add New User* and *Upgrade Your Account* information.

Folders

Creating a New Folder or a New Folder Group

Creating folders and folder groups will help a user organize their documents. New users will be given the folder group My Folders and the folder My Documents when they first log in to their iThenticate account.

Creating a New Folder Group	
1. Log into your iThenticate account and on the Folders page click on the <i>New Folder Group</i> link in the Info/Action Column	
2. In the Create A New Folder Group window enter a name for the new folder group and then click the <i>Create</i> button	
3. Now you have an empty folder group. Within the new folder content tab <i>Folders</i> , click on the link <i>Create a folder</i> to add a folder to this folder group. To delete an empty folder group, click on the <i>Remove this empty group</i> link	
4. If you clicked on the <i>Create a folder</i> link, the Create A New Folder window will open. Enter a name for the folder in the <i>Folder Name:</i> field	

Creating a New Folder Group	
5. Click within the check box for either <i>Exclude quotes</i> or <i>Exclude bibliography</i> or both to exclude them from comparison for all documents submitted in this folder	 <p>Check to exclude quoted text from comparison of docu <input type="checkbox"/> Exclude quotes</p> <p>Check to exclude bibliography from comparison of docu <input type="checkbox"/> Exclude bibliography</p>
6. Choose which collections to search.	 <p>Limit searches to these repositories: +</p> <p>Documents submitted in this folder will search checked repositories.</p> <p><input checked="" type="checkbox"/> CrossCheck</p> <p><input checked="" type="checkbox"/> Internet</p> <p><input checked="" type="checkbox"/> Publications</p>
7. Click <i>Create</i> to create the new folder	 <p>Create <u>Cancel</u></p>

Folder groups that already have a folder created in it will need to create a new folder in a different way.

Creating a New Folder	
1. Log into iThenticate and then click on the <i>New Folder</i> link within the Info/ Action Column	 <p>New folder</p> <p><u>New Folder</u></p> <p><u>New Folder Group</u></p>
2. In the Create A New Folder page, the user must first specify which folder group they would like to save this new folder to by using the <i>Folder Group:</i> pull-down menu to select the folder group destination	 <p>Folder Group: *</p> <p>Select Folder Group</p> <p>Select Folder Group</p> <p>My Folders</p> <p>New Folder</p>
3. Enter a name for the folder in the <i>Folder Name:</i> field	 <p>Folder Name: *</p> <p>New Document Folder</p>
4. Click within the check box for either <i>Exclude quotes</i> or <i>Exclude bibliography</i> or both to exclude them from comparison for all documents submitted in this folder	 <p>Check to exclude quoted text from comparison of docu <input type="checkbox"/> Exclude quotes</p> <p>Check to exclude bibliography from comparison of docu <input type="checkbox"/> Exclude bibliography</p>

<p>Creating a New Folder</p>	
<p>5. Click the check box for the Exclude Phrases option to exclude previously added phrases from documents submitted to this folder</p> <p>For information on how to add phrases for exclusion to a folder or an account please view the phrase exclusion section of this manual.</p>	
<p>6. The Exclude Small Matches option provides the ability to exclude match instances from the Similarity Report that are below the set word count threshold.</p> <p>Click on the check box next to Exclude Small Matches option, then enter a number into the word count field to exclude every match instance below the set threshold</p>	
<p>7. The <i>Exclude Small Sources</i> option provides the ability to exclude sources from the Similarity Report that are below a set threshold of either word count of aggregate match percentage.</p> <p>Click on the check box next to the <i>Exclude small sources</i> option, then enter a value into either the <i>Word Count</i> or the <i>Percentage</i> fields*</p>	
<p>8. The <i>Exclude Sections</i> options provides the ability to exclude the Abstract and Methods and Materials sections from Similarity Reports.</p> <p>Click on the check box next to the <i>Abstract</i> or <i>Methods and Materials</i> to exclude those sections from the Similarity Report**</p>	
<p>9. Choose which collections to search.</p>	
<p>10. Click <i>Create</i> to create the new folder</p>	

 ***Warning:** If large documents are going to be uploaded to a folder and matches are excluded by a percentage threshold, even a set percentage of 1% exclusion may exclude very large matches. For example, if a 120 page document is uploaded to the system and the exclusion is set by percentage, it is possible that a full page of unoriginal material will be excluded from a report. It is important to keep in mind the size of the documents being submitted to a folder when using the percentage exclusion for the customize match size option.

 ****Note:** Currently section exclusion may not work properly if documents contain:

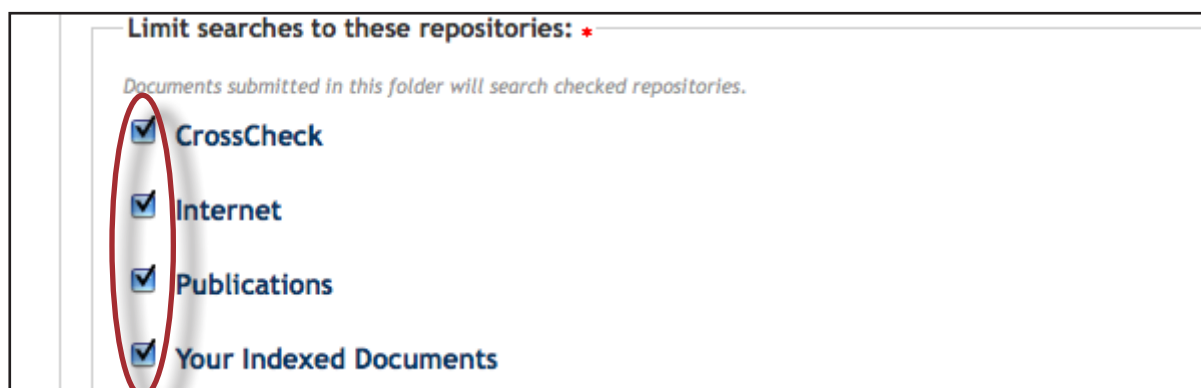

- Watermarks
- Unevenly spaced line numbering
- Sub-headings that are indistinguishable from the Methods and Materials heading
- Abstract or Methods and Materials section appear within a table
- Section heading and body text use the same font, font size, and font treatment

Please visit this site for more information about section exclusion functionality:

<http://www.ithenticate.com/products/whats-new/>

Database Sources for Similarity Reports

The user is able to select the available database sources to compare submissions against. Within the folder settings or when a folder is created the user can select which database collections will be searched. To search specific databases when documents are submitted to the folder click within the check boxes next to the databases to select them. If no databases are selected with a check next to their corresponding check box, then all databases will be searched when a document is submitted to this folder.

The currently available search indexes are:

- **CrossCheck** - research articles, books, and conference proceedings provided by the worlds scientific, technical and medical publishers
- **Internet** - a database of archived and live publicly available internet pages containing billions of pages of existing content and tens of thousands of new pages added daily
- **Publications** - third party periodical, journal, and publication content including many major professional journals, periodicals, and business publications
- **Your Indexed Documents** - clients have the ability to create their own customizable database within their account to compare against

 **Note:** If you would like to purchase the option to create a customizable database source with your own content to submit to and search against, please contact sales@ithenticate.com

Organizing Folders

Folders in the directory are organized alphabetically. When a folder has been clicked the folder content appears in the main content area of the page. The user has the option to organize the folders within a folder group by either title or date. To sort the folders by title or date, click on the *Title* or *Date* headers of the column.

To move folders to another folder group click on the check boxes to the left of the folder's name to place a check into the check boxes. Once a check has been placed, users are then able to use the *Move selected to...* pull-down menu and once the correct folder group has been selected, the user can click on the *Move* button to move the selected folders.

Moving folders	
1. Click on a folder group that contains folders that are going to be moved to a new folder group	
2. Click on the check boxes next to the name of the folders to add a check to the folders that the user wishes to move	
3. Use the <i>Move selected to...</i> menu to select the desired folder group destination of the checked folders	
4. Click on the <i>Move</i> button to move the folders to the new folder group	

Deleting Folders

Folders can be deleted in two ways: from the directory or from within the main content area. To delete a folder from the directory simply click on a folder group and hover the cursor over the folder that the user wants to delete and two icons will appear: a refresh icon and a trash icon. Click on the trash icon to delete the folder.

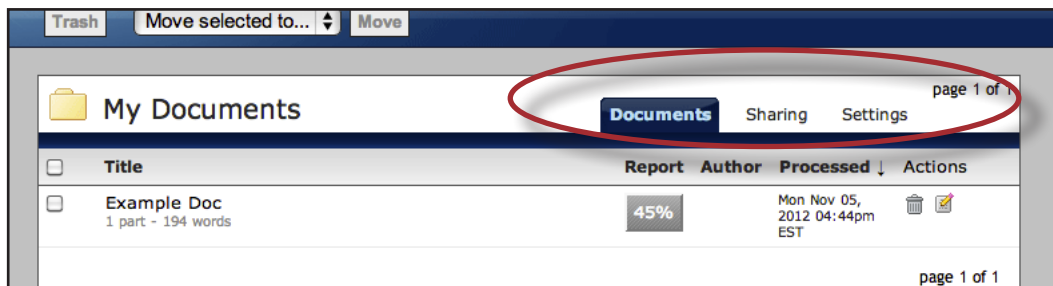

The other way to delete folders is from the main content area after a folder group has been selected.

Deleting a folder or multiple folders from a folder group	
1. Click on the folder group that contains the folders that the user wants to delete	
2. Place a check mark next to each folder that the user wants to delete by clicking in the empty check boxes to the left of the folders name. To select all folders, place a check in the check box next to the <i>Title</i> column header	
3. Click on the <i>Trash</i> button on the toolbar to send all checked folders to the Trash	

Folder Tabs

Within every folder there are four tabs that contain different folder options. They are:

- **Documents** - this tab contains all the documents that have been submitted to the folder. The documents tab also contains the Similarity Reports for the submitted documents
- **Sharing** - this tab allows you to share this selected folder with other iThenticate users who have been added to the iThenticate account
- **Settings** - this tab contains the folders options which you can adjust at any time

Documents

The documents tab within a folder displays all the submitted documents for a specific folder. Each submitted document generates a Similarity Report after the document has been compared to the databases selected by the user.

Submitting a Document

iThenticate users can submit documents using four available methods. The submission types are:

- **Upload a File** - a single file submission
- **Zip File Upload** - submit a standard zip file containing multiple documents. May contain up to 100MB or 1,000 files. Zip file uploads of significant size may require additional time to complete
- **Drag & Drop Upload** - a file is dragged from the user's computer and dropped on the drop area or added to the drop area by browsing the computer. You may upload up to 100MB or 1,000 files with the Drag & Drop Upload option
- **Cut & Paste** - submission of text copied and pasted into the submission box. May be used to submit from a file format that is not accepted. No images or non-text information can be copied and pasted - only plain text can be accepted

File Types and Size

iThenticate currently accepts the following file types for document upload:

- Microsoft Word® (DOC and DOCX)
- Word XML
- Plain Text (TXT)
- Adobe PostScript®
- Portable Document Format (PDF)
- HTML
- Corel WordPerfect® (WPD)
- Rich Text Format (RTF)

The file may not exceed 400 pages.

The file size may not exceed 40 MB. Files of larger size may be reduced in size by removal of non-text content. Files that are password protected, encrypted, hidden, system files, or read only files cannot be uploaded or submitted to iThenticate.

The zip file upload accepts up to 1000 files or 100MB of zipped information. A zip file to be uploaded may not exceed either limit. Zip files should be checked to ensure only usable file formats are included in the upload.

 **Note:** PDF documents must contain text to be submitted. PDF files containing only images of text will be rejected during the upload attempt. To determine if a document contains actual text, copy and paste a section or all of the text into a plain-text editor such as Microsoft Notepad or Apple TextEdit. If no text is copied over, the selection is not actual text.

 **Tip:** Users submitting scanned images of a document or an image saved as a PDF will need to use Optical Character Recognition (OCR) software to convert the image to a text document. Manual correction of the resulting document is highly recommended to fix any errors caused by the conversion software.

 **Note:** Some document formats can contain multiple data types. This includes text, images, embedded information from another file, and formatting. Non-text information that is not saved directly within the document will not be included in a file upload. This includes references to a Microsoft Excel® spreadsheet included within a Microsoft Office Word document.

 **Note:** Users whose files are saved in a file type that is not accepted by iThenticate will need to use a word processing program to save the file as one of the accepted types. Rich Text Format and Plain Text file types are nearly universally available in word processing software. Neither file type will support images or non-text data within the file. Plain text format does not support any formatting, and rich text format supports only limited formatting options.

 **Warning:** Users who are converting to a new file format will need to save their file with a name different than the original. Any file should be saved with a new file name when converting to plain text or rich text formats to prevent permanent loss of the original formatting or image content of a file.

Report & Repository Options

For iThenticate accounts that purchased a customizable comparison database, you will see the following options when you click to upload a document (with the exception of the Drag & Drop option):

Report & Repository Options: *

- to Document Repository & Generate Report
- to Document Repository Only
- Generate Report Only

to Document Repository & Generate Report - will deposit the upload in the repository for future comparison and will generate a report as compared to any or all of the repositories you have selected.

to Document Repository Only - will deposit upload in the repository, but will not generate a report. You will see this file in your folder and under the Report column it will show "None".

Generate Report Only - will simply generate report, and will not include the upload in the repository.

Upload a File

The upload a file submission option allows the user to submit a document from a variety of document types.

Submitting a document by file upload:	
<p>1. In the Info/Action column under <i>Submit a document</i> click on the <i>Upload a File</i> link</p>	
<p>2. (Optional) The document will be uploaded to whichever folder was selected before clicking on the <i>Upload a File</i> link. The user does have the option to upload the document to a different folder by using the <i>Upload a folder:</i> pull-down menu</p>	
<p>3. (Optional) Enter information for the following fields: <i>What is the document title</i>, <i>What is the author's first name</i>, <i>What is the author's last name</i>.</p> <p> Note: If no title has been entered, iThenticate will automatically use the uploaded document's title for the title of the document</p>	
<p>4. Click the <i>Browse</i> button and locate the document to upload</p>	
<p>5. (Optional) The user can upload up to 10 documents at once using the <i>Upload a File</i> submission option. To add another file to upload click on the <i>Add another file</i> link</p>	
<p>6. Click the <i>Upload</i> button to upload the selected document/s. Click the <i>Cancel</i> link to cancel the upload</p>	

Zip File Upload

The zip file submitted to iThenticate may be any size up to approximately 100MB and contain up to 1000 individual files. If the zip file exceeds either limit it will be rejected.

Users uploading zip files are advised to ensure that no unacceptable file types are contained within the zip file and to be careful of duplicate copies of the same file within the zip file. iThenticate will attempt to detect duplicate or invalid files and warn the user of any duplicate or unacceptable files.

Submitting multiple documents in a zip file:	
1. In the Info/Action column under <i>Submit a document</i> click on the <i>Zip File Upload</i> link	 <p>Submit a document</p> <p>Upload a File</p> <p>Zip File Upload</p>
2. (Optional) The zip file will be uploaded to whichever folder was selected before clicking on the <i>Zip File Upload</i> link. The user does have the option to upload the zip file to a different folder by using the <i>Upload a folder:</i> pull-down menu	 <p>Upload to folder: *</p> <p>My Folders - February 2008</p> <p>Select Upload to folder</p> <p>My Folders - February 2008</p> <p>My Folders - January 2008</p>
3. (Optional) Enter information for the following fields: <i>What is the document title</i> , <i>What is the author's first name</i> , <i>What is the author's last name</i> .	 <p>What is the document title:</p> <p>What is the author's first name:</p> <p>What is the author's last name:</p>
 Note: If no title has been entered, iThenticate will automatically use the uploaded document's title for the title of the submitted documents	
4. Click the <i>Browse</i> button and locate the zip file to upload	 <p>Browse for the file you would like to submit</p> <p>Browse...</p>
5. Click on the Upload button to upload the zip file	 <p>Upload Cancel</p>
6. A new page will open and asks you to Please confirm files to upload. At this point the user can choose to exclude certain files in the upload. To exclude a file from submission uncheck the check box next to the <i>Upload this file?</i> by clicking on it	 <p>Upload this file?</p>

Submitting multiple documents in a zip file:	
7. You will need to manually change the title for each document being submitted. iThenticate will make the title of the submitted zip file the default title of each submission. The user can also fill in the Author's first and last name fields which are optional.	
8. Once the files have been reviewed and are made ready to upload, click on the <i>Upload</i> button at the bottom of the page	

Multiple File Upload

This submission method allows the user to click and drag a document and drop it into the drop box, or the user can add files like in the Upload a File submission option but in a slightly different way.

Submitting documents with Multiple File upload	
1. In the Info/Action column under <i>Submit a document</i> click on the <i>Multiple File Upload</i>	
2. There are two ways to upload files into the drag-n-drop box: by using the Add button or by dragging and dropping files in the Drag-n-Drop box	
3a. To upload a file using the Add button, first click on the Add button	
3b. Select the file/files from the Open window that would like to be uploaded to iThenticate and click on Choose once they have been selected. The file/s will be uploaded to the Drag-n-Drop box	

Submitting documents with Multiple File upload	
<p>4. To upload a file by the drag and drop method, the user must either with a held click, drag a file/s from their computer's desktop or open a folder and click and hold the files wanted to be uploaded and simply drag those files until the cursor is over the Drag-n-Drop box, a green plus sign will appear next to the cursor and the file's name will appear. Let go of the held click.</p> <p>The file will be added to the drag and drop box.</p>	
<p>5. Before uploading the files, the user should check the selected documents in the Drag-n-Drop box and make sure the files are in the proper file types that iThenticate accepts. If a file has been added that you would like to remove, select the file by clicking on it. It will become highlighted, and click on the <i>Remove</i> button to remove that file.</p>	
<p>6. Once the user has selected the specific files to upload, click on the <i>Upload</i> button to upload the files in the Drag-n-Drop box</p>	

The Multiple File option allows the user to upload as many 1000 files and up to 100MB total for upload. The Multiple file contains a summary feature that displays the amount of files and total size of all the files that have been added to the Drag-n-Drop box.

Cut & Paste

The cut and paste submission option allows users to submit information from non-supported word processors or file types, or to only submit specific parts or areas of a document that may need a Similarity Report generated.

Please note that only text can be submitted via the cut and paste method - any graphics, graphs, images, and formatting are lost when pasting into the text submission box.

Submitting by Cut and Paste	
1. In the Info/Action column under <i>Submit a document</i> click on the <i>Cut & Paste</i> link	
2. (Optional) The document will be uploaded to whichever folder was selected before clicking on the <i>Copy & Paste</i> link. The user does have the option to upload the document to a different folder by using the <i>Upload a folder: pull-down menu</i>	
3. Although the <i>What is the document title:</i> field is optional it is recommended to enter a document title for cut and paste submissions If no title is entered, iThenticate will name the cut and pasted document, <i>Pasted Document</i>	
4. (Optional) Enter information for the following fields: <i>What is the author's first name:</i> and <i>What is the author's last name:</i>	
5. Copy the selected text, click into the area provided in the <i>Paste your document in the area below:</i> and paste the copied text	
6. Click the <i>Upload</i> button to submit the pasted text	

Viewing Similarity Reports

iThenticate Similarity Reports provide an overall similarity index for each submission. This index determines the percentage of similarity between a submission and information existing in the iThenticate databases selected as search targets.

To view a Similarity Report click on the folder that the document was submitted to and then click on the similarity index icon under the *Report* column.

My Documents		Documents	Sharing	Settings	Resubmit
Title	Report	Author	Processed		
Pasted Document 1 part - 288 words	0%		03/27/08		
testpaper.doc 1 part - 1,956 words	95%		03/26/08		
test2.doc 1 part - 252 words	99%		03/26/08		

Clicking on the similarity index icon opens up the Similarity Report. The Similarity Report is separated into three main areas in the default view. These three areas are:

- **paper information** - the top of the report page shows information about the submitted paper. This includes the paper title, the date the report was processed, the word count, the folder the document was submitted from and the number of matching documents found in the selected databases
- **paper text** - the text of the submitted paper. Matching text is highlighted in a color that corresponds to the matching source listed on the right side of the Similarity Report
- **matching sources** - the list of matching sources for the highlighted areas within the paper text

The Document Viewer (DV) provides a document's original format, including images, tables and graphs, within the Similarity Report.

Paper Information
 Relation of Mass to Diameter in Neutron Stars
 BY BARBARA ASAAROV
 Quotes excluded: 37%
 Bibliography included

Match Overview

Match	Source	Words	Percentage
1	Internet	465 words crawled on 02-Sep-2011	16%
2	CrossCheck	221 words Matthias Roth, "Review of the urban climate research in (sub)tropical regions", International Journal of Climatology, 11/30/2007	13%
3	Publications	72 words Ken Jackeddy, "The Gears of Time", Popular Mechanics, 4/16/1983	8%

Paper Text

Relation of Mass to Diameter in Neutron Stars
 B. Asaarov
 The combination of the radius and the mass of a star determines the surface gravity. Giant stars have a much lower surface gravity than main sequence stars while the opposite is the case for degenerate, compact stars such as white dwarfs. The surface gravity can influence the appearance of a star's spectrum, with higher gravity causing a broadening of the absorption lines.

① Mercury • Mars • Venus • Earth
 ② Earth • Neptune • Uranus • Saturn • Jupiter

Document Viewer Report Modes

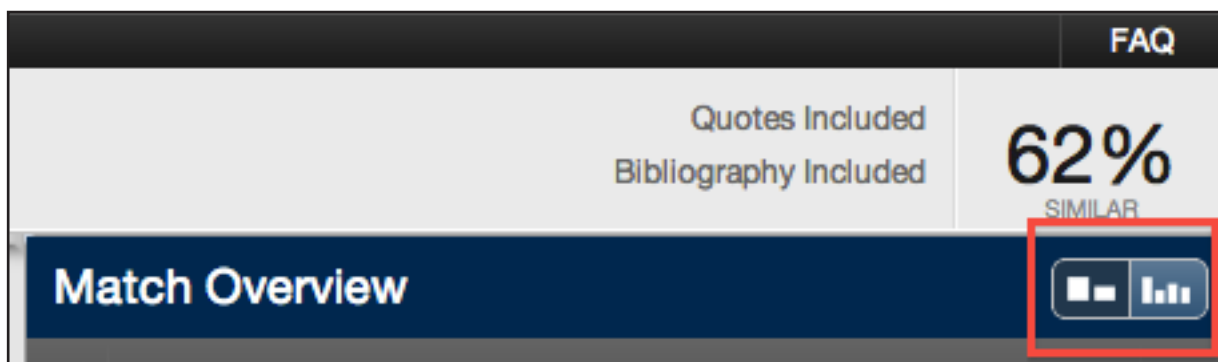

The Document Viewer can be viewed in four different modes. These modes allow users to view and sort the information contained in the Similarity Report in any way best suited to their needs. The four modes for viewing an Similarity Report are:

- **Match Overview** (show highest matches together): A list of all areas of the paper which have similarity to information in the selected search repositories. Matches are color coded and listed from highest to lowest percentage of matching word area to the submission. Only the top or best matches are shown, all underlying matches are visible in the Match Breakdown and All Sources modes
- **All Sources**: Allows a user to view matches between the paper and a specific selected source in the content repositories. Contains a full list of all matches found rather than the best matches per area of similarity. This listing is exhaustive but will show all matches found, including any that are obscured in the Match Overview by virtue of being in the same or similar areas as other, better matches
- **Match Breakdown**: Displays matches that are obscured by a top source. Allows users to compare the match instance of a underlying source with the match instance for a top source
- **Side By Side Comparison**: An in depth view that shows a document's match compared side by side with the original source content from the content repositories. Not available on all types of repository matches

View Mode Icons

The view mode icons allow users to switch between the Similarity Report viewing modes: Match Overview and All Sources view. The default viewing mode is the Match Overview (the view mode icon on the left).

To change the view mode for an Similarity Report to the All Sources view, click on the *All Sources* icon (the view mode icon on the right). The sidebar will automatically update to the All Sources view mode.

Match Breakdown Mode

By default the Similarity Report opens in Match Overview mode. In some cases, matches to smaller areas of similarity may be obscured by larger matches and not shown on this view mode. To find the underlying sources, hover over the match you would like to view the underlying sources for and click on the arrow icon that appears.

In this mode all sources that are obscured by the selected top source are listed below the top source. Click on a source to display the highlights for the match. The highlight for the top source match will become lighter and the match to the selected underlying source will be displayed with a darker highlight.

To return to the Match Overview mode click on the back arrow next to Match Breakdown at the top of the sidebar.

Viewing Live Web Pages for a Source

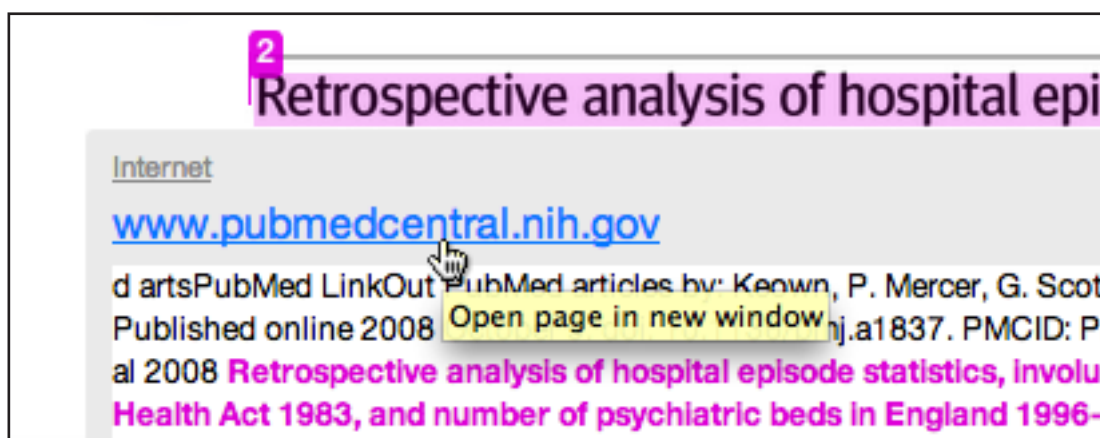

If a source is available on the internet users can open that source within a new browser tab by hovering over the match and clicking on the view source icon that appears. The only report mode that does not provide this ability within the sidebar is the Match Overview mode.

To access the live web page within Match Overview, users can first click on a match within the document.

Once the glimpse of the match within the original source appears, a user can hover over the blue source title to see if the source can be viewed in a new webpage. If the source is a link click on the source link to open a new web page containing the original source.

 Note: Some Internet sources may link to pages that no longer exist on a website.

Side by Side Comparison

Side by side comparison allows users to compare matching text within a document to the source of the match in the content repositories. Users can either view the Direct Source Comparison as a glimpse within the paper or as the Full Source Text within the sidebar. The glimpse only provides the matching text within context of a few outlying sentences from the source while the Full Source Text loads in the sidebar and contains the full text of the source and all the match instances.

To view the glimpse of the matching text within the original source click on a matching instance of text within the document.

Accessing side by side comparison:	
1. Open up the glimpse pop-up window by clicking on a matching section of text within the document	
2. Click on the “x” in the top right corner of the pop-up to close the window	
3. Click on the Full Source View link to view the full source with the matching instances in the sidebar	
4. The Source’s full text will load in the sidebar with each matching instance to the document highlighted in red. Click on the source title/URL to open up the original source in a webpage	
5. If there are multiple matches to this source, click on the arrow icons to quickly navigate through the match instances	
6. To exit side by side mode click on the “X” button	

Excluding Quoted or Bibliographic Material

If quoted or bibliographic material is flagged as similar or matching, this information can be removed from the Similarity Report within the Document Viewer through the Filter settings sidebar.

Excluding quoted or bibliographic Matches:	
1. Click on the <i>Filter and Settings</i> icon at the bottom of the Document Viewer sidebar to access the Filter and Settings sidebar	
2. To exclude Quoted or Bibliographic material click the check box next to the <i>Exclude Quotes</i> and <i>Exclude Bibliography</i> exclusion options	
3. Click on the <i>Apply Changes</i> button at the bottom of the filter and settings sidebar to apply the changes	
4. Review the revised report. Quoted or bibliographic material can be re-included by deselecting the <i>Exclude Quotes</i> and <i>Exclude Bibliography</i> options within Filter and Settings and then clicking on <i>Apply Changes</i>	

Excluding Small Sources

Users have the ability to exclude small sources by either the aggregate match word count for a source or by source matching percentage. To exclude small sources within a Similarity Report click on the *Filter and Settings* icon below the sidebar.

The sidebar will load with the exclusion options. Below the *Exclude sources that are less than:* option enter into either the *words* or *%* fields the numerical value for small sources that will be excluded from this Similarity Report. To turn off excluding small sources click on the radio button next to *Don't exclude by size* and then click on the *Apply Changes* button. This feature can be adjusted at any time.

Exclude sources that are less than:

words
 %
 Don't exclude by size

Excluding Small Matches

Users have the ability to exclude match instances in a report. To exclude small matches within a Similarity Report click on the *Filter and Settings* icon below the sidebar.

The sidebar will load with the exclusion options. Below the *Exclude matches that are less than:* option enter into the *words* field the numerical value for match instances that will be excluded from this Similarity Report. Match instances below the set threshold will be excluded from the Similarity Report.

To turn off excluding small matches click on the radio button next to *Don't exclude by size* and then click on the *Apply Changes* button. This feature can be adjusted at any time.

A dialog box titled "Exclude matches that are less than:". It contains two radio buttons. The first is unselected and is next to a text input field containing the word "words". The second radio button is selected and is next to the text "Don't exclude".

Excluding Sections

Users have the ability to exclude the Abstract and Methods and Materials sections in a report. To exclude sections within a Similarity Report click on the *Filter and Settings* icon below the sidebar.

Click on the *Abstract* and *Methods and Materials* check boxes and then click on the *Apply Changes* button to exclude those sections from the report.

A dialog box titled "Exclude Sections:". It contains two checked checkboxes. The first is labeled "Abstract" and the second is labeled "Methods and Materials". Below the checkboxes is the text "Includes variations: Methods, Method, Materials, Materials and Methods". At the bottom of the dialog is a blue button labeled "Apply Changes" with a downward-pointing arrow icon.

Excluding a Match

Any source can be removed from the Similarity Report through the Match Breakdown or All Sources viewing modes. This allows the user to remove a match from consideration, if the user determines the match is not needed. The similarity index will be recalculated and may change the current percentage of the Similarity Report if matches are excluded.

To exclude a match:	
1. To exclude matches for a top match in the Match Overview hover over the match you would like to view the underlying sources for and click on the arrow icon that appears to enter Match Breakdown mode.	
2. To exclude matches from the All Sources view click on the All sources icon at the top of the side bar	
3. Click on the <i>Exclude Sources</i> button at the bottom of the sources list to enter source exclusion mode	
4. Select the sources that you would like to remove by clicking in the check box next to each source	
5. Once all the sources are selected click on the <i>Exclude (#)</i> button located at the bottom of the sidebar to exclude the sources	

Exclusion List

The Exclusion List contains each source that was excluded from the Similarity Report.

To access the exclusion list click on the Exclusion List icon at the bottom of the sidebar.

<p>To include a match from the exclusion list:</p>	
<p>1. Within the <i>Exclusion List</i> a check box appears next to each excluded source. Click on the check box next to the source you would like to include back into the Similarity Report</p>	
<p>2. Click on the <i>Restore (#) & Recalculate</i> button to include the source in the Similarity Report</p>	
<p>3. To restore all of the sources that were excluded from the report click on the <i>Restore All</i> button</p>	
<p>4. If the included source affects the Similarity Index percentage the percentage will recalculate</p>	

Downloading a PDF Version of a Similarity Report

The Similarity Report can be downloaded in a print friendly PDF to the user's computer for later reference.

To print/download a report, click on the print icon at the bottom of the Originality Report. This will prepare a readable, PDF version of the Originality Report. When downloading a report, the downloaded version created is based on the current view of the Similarity Report. For example, clicking the download icon while using the default Match Overview will create a PDF of only the highest matches.

Accessing the Text Only Report

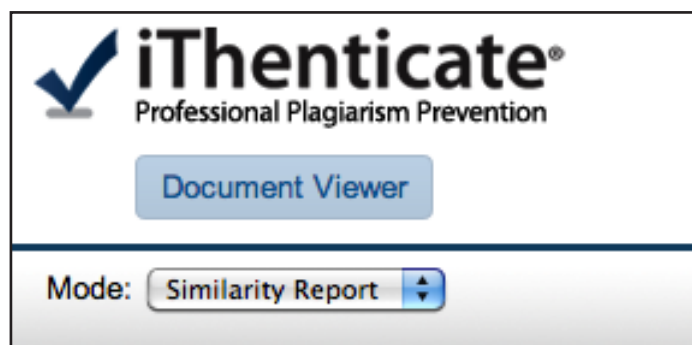

The Text-Only report allows users to view the Similarity Report without the document formatting and displays only the unformatted document text.

Users can navigate back to the Text-Only report by clicking on the *Text-Only Report* button at the bottom right of the Document Viewer window.

Note: The Similarity Report will open in the report view that a user last used. For example, if a user viewed a report in the DV and then closed the report window, the next time that user views a report, it will open in the DV.

To navigate back to the Document Viewer from the Text-Only Similarity Report click on the *Document Viewer* button in the top left of the Text-Only report.

Clicking on the Text-only Report button opens up the text-only view of Similarity Report. The text-only Report is separated into three main areas in the default view. These three areas are:

- **paper information** - the top of the report page shows information about the submitted paper. This includes the paper title, the date the report was processed, the word count, the folder the document was submitted from and the number of matching documents found in the selected databases
- **paper text** - the text of the submitted paper. Matching text is highlighted in a color that corresponds to the matching source listed on the right side of the Similarity Report
- **matching sources** - the list of matching sources for the highlighted areas within the paper text

The screenshot displays the iThenticate software interface. At the top, there's a navigation bar with 'Return to Folders View' and 'Jump to: Media news article - 41%'. The main header shows 'iThenticate Paper Information' and 'Media news article'. On the right, it indicates 'Processed on: Mar 27, 2008 2:16:53 PM', 'Word count: 737', and 'Folder: My Documents'. Below the header, there's a 'Similarity Index: 41%' and a 'View: Similarity Report' dropdown. The main content area shows a document with highlighted text in green and red. A 'Matching Sources' panel on the right lists two sources: '1 22% match (Internet) www.mediareview.org' and '2 19% match (Internet from Jun 17, 2007) en.wikipedia.org'. The interface also includes links for 'Exclude Quotes' and 'Exclude Bibliography'.

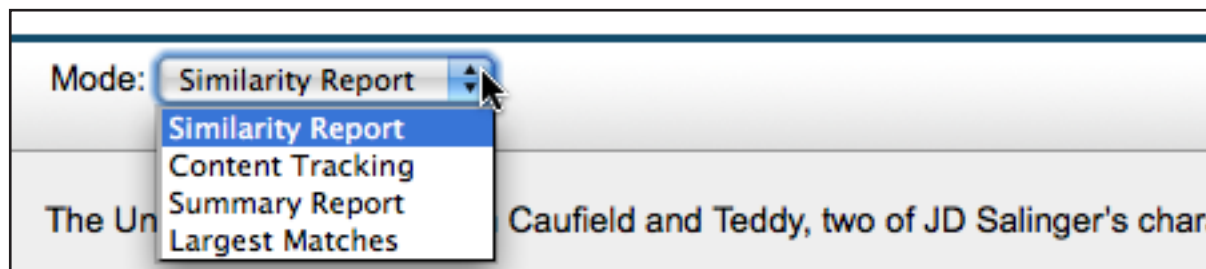

Warning: The similarity indices do not reflect iThenticate's assessment of whether a paper has or has not been plagiarized. Similarity Reports are simply a tool to help our clients find sources that contain text similar to the submitted documents. The decision to deem any work plagiarized must be made carefully, and only after an in depth examination of both the submitted paper and suspect sources.

Viewing Modes

There are four modes in which to view a Report:

- **Similarity Report** - this is the default viewing mode for the Similarity Report. Provides a list of all areas of the paper which have similarity to information in the iThenticate databases. Matches are color coded and listed from highest to lowest percentage of matching word area within the submission. Only the top or best matches are shown, all underlying matches are visible in the Content Tracking viewing mode. By clicking on the highlighted area of the text, the matching sources displays the actual source from the website and which part of the original writing was matched with the submitted document
- **Content Tracking** - the content tracking similarity report view mode lists all the matches between the databases and the submitted document. Since iThenticate updates its database regularly it may have many matches from the same source. The sources that are the same will specify when they were copied from the internet.
- **Summary Report** - a simple, printable list of the matches found followed by the paper with the matching areas highlighted
- **Largest Matches** - the report shows the percentage of words that are a part of a matching string of words (with some limited flexibility), in the Content Tracking view the report shows the percentage of matching words for a source regardless of whether or not the words are pieces of matching strings. In some cases, strings from the same source may overlap, in which case, the longer string in the Largest Match view will be displayed.

To select the view mode, click on the *Mode:* pull-down menu and select a viewing mode.

Changing Viewing Modes

By default the Similarity Report opens in the similarity report view mode which displays the highest matches within the matching sources. In some cases smaller areas of similarity may be obscured by larger matches and not shown with this view mode. To find the underlying sources, use the Content Tracking view mode to show an exhaustive list of the sources.

When a viewing mode has been changed by selecting it from the View: pull-down menu, the Similarity Report browser window will reload to display this view.

The Content Tracking view mode when selected, lists all sources, even those that are obscured by larger percentage matches in the default view. Select a source to display on the student paper to the left by clicking on the radio button next to a source. When printing, this view mode will print only the currently selected source.

Users may also view the Similarity Report showing only matching text and source links without the matching sources view. This is known as the Summary Report view mode. This view mode allows a user to view a source in its original format from the internet, or from the iThenticate database if the source is a journal or periodical, by clicking on the name of the source at the top of the Similarity Report. The Summary Report view mode is similar to the printed view of the Similarity Report.

The last mode is the Largest Matches viewing mode. This mode is very similar to the default mode but with one main difference, this viewing mode shows the percentage of words that are a part of a matching string of words, so the percentage for a matching source may change in this viewing mode.

Viewing the Matching Source

The matching source can either be viewed from the database or from the internet source. To view the internet source simply click on the link under the percentage of similar material found in the submitted document.

22% match (Internet) www.monthlyreview.org
19% match (Internet from Jun 17, 2007) en.wikipedia.org

To view the matching material side by side with the submitted document, use either the similarity report view or the largest matches view. To view the matching content in the Matching sources area of the similarity report, click on the highlighted text within the submitted document. Once clicked the source material will be displayed to the right of the submitted document from the matching database source.

The screenshot shows a side-by-side comparison of a submitted document and a matching source. On the left, the submitted document contains the following text:

programming is to compare the content of programs paid for and chosen by the viewer with those on channels that get their income mainly from advertisements.

The media is how people learn about world affairs and recent news. In a certain respect we can say that media provides a lens in which the viewers can view the world.

A recurring issue for the left historically has been how to address the capitalist media. In recent years the problem has grown ever more severe, and no small amount of attention has been given to examining the problems of the commercial media and how closely they reinforce and accentuate problems within the broader social order. The logic of this criticism has become clear: progressives need to work on challenging the corporate domination of media as part of the broader struggle for social justice. If changing media is left until "after the revolution," there will be no revolution, not to mention fewer chances for social reform. But politicizing control over media has proven to be extraordinarily difficult for activists. That is why the massive and largely unanticipated 2003 campaign in the United States to stop further media concentration, which almost overnight reached a scale not seen in media reform struggles since the 1930s, is so important and instructive. This article

On the right, the matching source is displayed in a separate window. The matching text is highlighted in red and matches the text in the submitted document. The source is identified as "22% match (Internet) www.monthlyreview.org". A red circle highlights the matching text in both windows. A mouse cursor is pointing at the highlighted text in the submitted document.

To exit the matched database content, click on the x button to the right of the similarity percentage to return to all the matching sources.

The screenshot shows a matching source entry in the iThenticate interface. The entry is labeled "match (Internet from Jun 17, 2007) en.wikipedia.org". A red circle highlights a small "x" button in the top right corner of the entry, which is used to exit the matched database content.

Excluding Quoted or Bibliographic Material

If quoted or bibliographic material is flagged as similar or matching, this information can be removed from the Similarity Report. When quoted or bibliographic material is excluded from a Similarity Report it may change the percentage of matching text found within the submission.

Excluding quoted or bibliographic matches:	
1. Open a Similarity Report	
2. Click on the <i>Exclude Quotes</i> or <i>Exclude Bibliography</i> links	
3. Review the revised report. Quoted or bibliographic material can be reincluded by clicking the <i>include quotes</i> or <i>include bibliography</i> links	

Excluding Phrases

When the exclude phrases setting is enabled for a folder any submission made to that folder will include an option within a Similarity Report to toggle between excluding and including phrases contained in the account or folder's phrase exclusion list.

Excluding a Match

Any source or match source found in the iThenticate Database can be excluded from the Similarity Report in either the *similarity report* or *highest matches* viewing modes. This allows the user to find any underlying sources or, if it has been determined a match is not needed, to remove it from consideration. The similarity index will be recalculated and may change the current percentage of the similarity index if matches are excluded.

To exclude a match, the user must open a Similarity Report and view it in the similarity report or highest matches mode. To the right of each source listed for a match will be a gray X icon. Click on this icon to exclude the source. Any underlying source, if present, will replace the excluded source.

Once a source has been excluded it can be reincluded to the Similarity Report through the content tracking viewing mode. The content tracking view mode lists all sources that have matching content with the submission. The excluded sources will appear with a plus icon to the right of their name within this view mode. To reinclude the source within the Similarity Report, click on the plus icon.

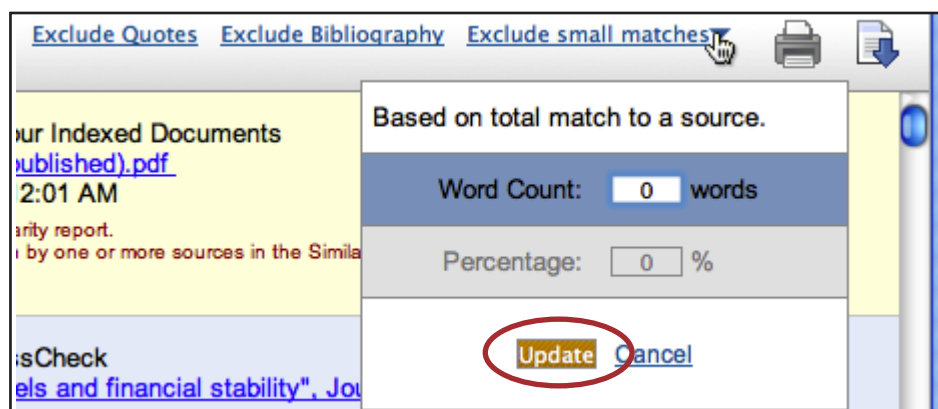

Excluding Small Matches

If the *Exclude Small Sources* option was set for a folder then the *Exclude small matches* option within a report will reflect that setting. The setting within a report can be adjusted at any time. If the customize match size option was not set for a folder you can set a threshold to exclude small matches from within the report. To do this first click on the *Exclude small matches* drop down.

Enter a value into either the Word Count or Percentage field to set an exclusion threshold. Any source below that threshold will be excluded from the report. Click on the *Update* button to set the exclusion setting.

Edit Document Information

A document's information (i.e. title of the document, Author first and last name) may be edited at any time by clicking on the edit icon to the right of a document in a folder's inbox.

To update the document's information within the Document Properties page adjust the fields accordingly and click on the Update button

A screenshot of the 'Document Properties' page. The page has a header with 'Document Properties' on the left, 'Properties' in a blue box in the center, and 'Resubmit' on the right. The main content area contains three text input fields: 'Document Title: *' with 'Source A' entered, 'Author First Name:', and 'Author Last Name:'. At the bottom left, there is a yellow 'Update' button circled in red, and a 'Cancel' link. On the right side, there is a 'Document Information' sidebar with the following details: 'Uploaded: Tue May 29, 2012 03:03pm PDT', 'Filename: Source A.docx', 'Folder: Report video documents', 'Indexed: Yes (remove)', and 'Re-Submit: No schedule set create schedule'.

A document that was added to the custom repository may be removed from the repository without deleting the file from the Document Properties page. Click on the *remove* link next to Indexed: Yes row of the sidebar to remove the document from the custom repository.

Document Information

Uploaded: Tue May 29, 2012
03:03pm PDT

Filename: Source A.docx

Folder: [Report video documents](#)

Indexed: Yes ([remove](#))

Re-Submit: No schedule set
[create schedule](#)

Document Pages

Only a specified amount of documents are displayed on the screen at once, if more documents are in the folder but not displayed the pages feature will appear beneath the documents. Either select which page you would like to be displayed by clicking on the page number or click on the *Next* link to scroll to the next page of documents.

Viewing Page: 1 of 5

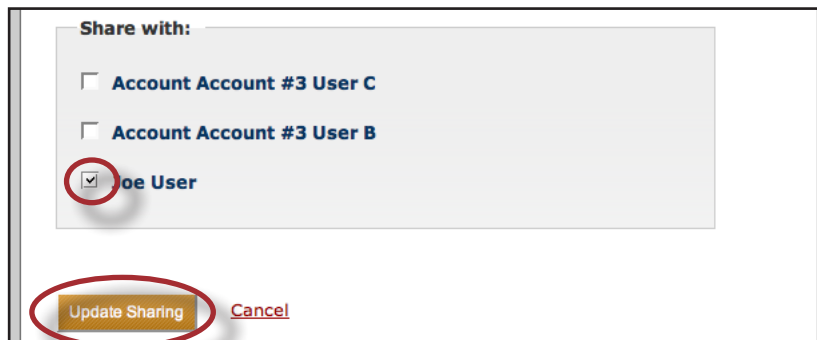

1 [2](#) [3](#) [4](#) [5](#) [Next](#)

Sharing Tab

The sharing feature allows the iThenticate user to share folders with other users added to the same account. To view the sharing options click on the sharing tab. The sharing options list the users on the iThenticate account the folder can be shared with.

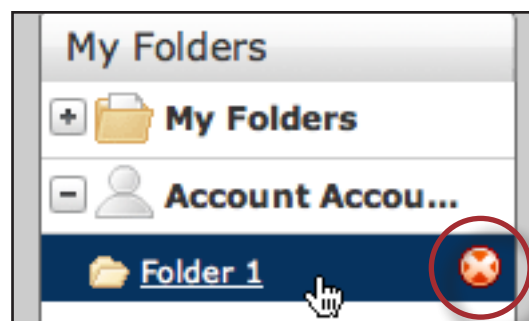

To share a folder, click on the check box next to the user's name that you would like to share with and then click on the *Update Sharing* button.

When a folder has been shared with another user, that user can only view the Similarity Report and is unable to submit a document to the folder.

Once a folder has been shared, there are two ways to have the folder not shared: either by the user who shared it or by the user who it is being shared with. If the user who is sharing the folder decides not to share it anymore, simply uncheck the box next to the users name who the folder is being shared with and click on the *Update Sharing* button.

For the user who a folder has been shared with, the shared folder appears in the users directory. When the cursor is placed over the shared folder a red X icon appears to the right of the folder name. Click on the X icon to have the folder not shared with you anymore.

Note: Account Administrators will enable or disable sharing access based on your company's internal guidelines. Please check with your account administrator. If the sharing feature is disabled, users will not be able to view previously shared documents.

Settings Tab

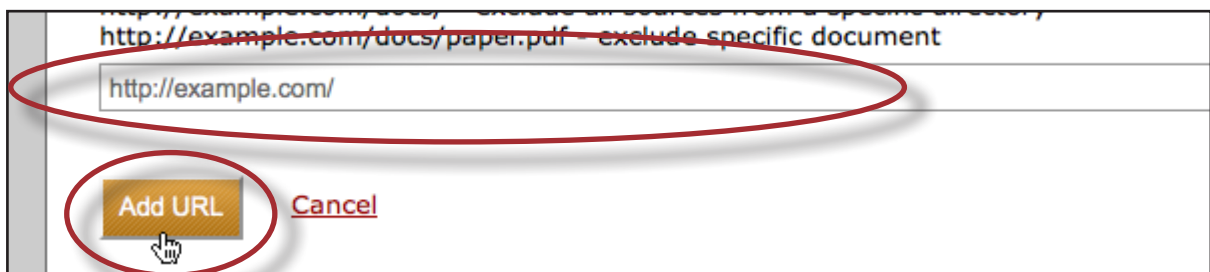

The Settings tab within a folder allows a user to customize the folder's settings at any time. The Settings tab within a folder contains two tabs: Folder Options and Report Filters. The Folder Options contains similar material as the folder creation screen, and this information can be updated at any time. The Report Filters tab allows a user to manage a list of URLs that are filtered out of the matching content search when a report is being generated for the folder. To add a URL to be filtered, first click on the Report Filters tab within the Settings tab.

When adding a URL, the URL may be as specific or general as you wish. Here are some examples:

- <http://example.com/> - exclude entire site (note trailing "/")
- <http://example.com/docs/> - exclude all sources from a specific directory
- <http://example.com/docs/paper.pdf> - exclude specific document

To add a URL simply place it within the Add URL field and click on the Add URL button to add that URL to the report filters.

To remove a URL once it has been added to the Report Filters, click on the red x icon to the right of the URL's name.

Phrase Exclusions

Phrase Exclusion allows users to specify phrases to be excluded from reports and can be applied at the folder or at the account level. Adding phrases to the exclusion list follows the same process whether for an account or for a folder. To access the folder’s phrase exclusion list click on the *Settings* tab for a folder and then click on the *Phrase Exclusions* tab.

Once on the Exclusion list page follow the below steps to add phrases to the exclusion list:

Adding phrases to the exclusion list:	
1. Click on the <i>Add an new phrase</i> link	
2. Enter the phrase to be added to the list within the Phrase text: field	
3. Click the Create button to add the phrase to the list	
4. Repeat steps 2 and 3 for each phrase added to the exclusion list	
5. To go back to the exclusion list page click on the <i>Back to list</i> link	

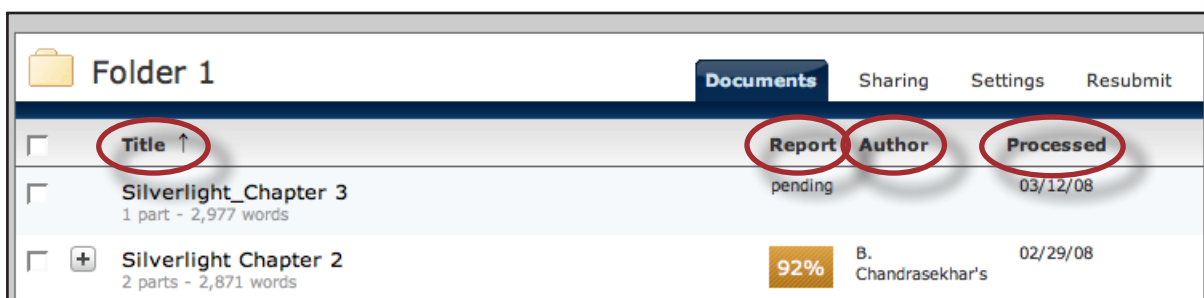

Print and Download Similarity Reports

The iThenticate Document Viewer report mode allows download of a formatted pdf of the current report view.

The text-only report uses print style sheets to provide the print feature. To get a print version of a report, you would just use file->print in your browser while viewing a Similarity Report. Likewise, to "download" a copy of a report use the file->print feature in your browser and choose pdf. Browsers will save the files required to view the page locally on your computer.

Organizing Documents

Documents in folders are organized alphabetically by title. When a folder has been clicked the documents tab appears in the main content area of the page. The user has the option to organize the documents within a folder by either Title, Report, Author, or Processed. To sort the folders by one of the column headers, click on the header of that column.

Moving Documents

Moving documents is exactly like moving folders.

Moving documents to another folder:	
1. Click on the folder that contains the document you would like to move	
2. Click in the check boxes the documents you would like to move. If you would like to move all documents click in the checkbox next to the title header. All the folders documents will become selected	

<p>Moving documents to another folder:</p>	
<p>3. From the <i>Move selected to...</i> pull-down menu on the toolbar, select which folder you would like the documents to be moved to</p>	
<p>4. Click on the <i>Move</i> button to move the selected buttons to the folder you selected. The selected documents will be moved to the new folder.</p>	

Documents can also be moved by clicking and dragging a document to another folder. To drag multiple files to a new folder place a check mark next to the documents you would like to move. Hold down a click on the file that you would like to drag and move the cursor, a document icon will appear.

If multiple documents are selected by placing a check next to the documents, a slightly different icon will appear.

Drag the document/s to the folder you would like to move it too, the green document drop icon will appear. Let go of the held click over the folder you would like to move the document/s, and they will be moved to that folder.

Deleting Documents

Documents can be deleted in two ways. To delete a document from the main content area simply click on a group and hover the cursor over the document that the user wants to delete and three icons will appear: a refresh icon, a trash icon, and an edit icon. Click on the trash icon to delete the document.

Deleting a document	
1. Click on the folder that contains the document(s) that the user wants to delete	
2. Place a check mark next to each document that the user wants to delete by clicking in the empty check boxes to the left of the document's name. To select all documents, place a check in the check box next to the <i>Title</i> column header	
3. Click on the <i>Trash</i> button on the toolbar to send all checked documents to the Trash	

To edit the documents title or the name of the author, click on the edit icon.

The edit document page will appear. If any changes have been made, click on the *Update* button to save the changes to the document.

The screenshot shows a form with three text input fields and two buttons. The first field is labeled "Document Title: *" and contains the text "1333: Account Account #3 User D". The second field is labeled "Author First Name:" and contains the text "James". The third field is labeled "Author Last Name:" and contains the text "Indianapolis". Below the fields are two buttons: a yellow "Update" button and a red "Cancel" button. A mouse cursor is pointing at the "Update" button.

Search for Documents

The search function allows users to search for a documents. Documents can be searched by folder, title, and author. To search all documents, type the criteria into the search text area and click on the *Search* button.

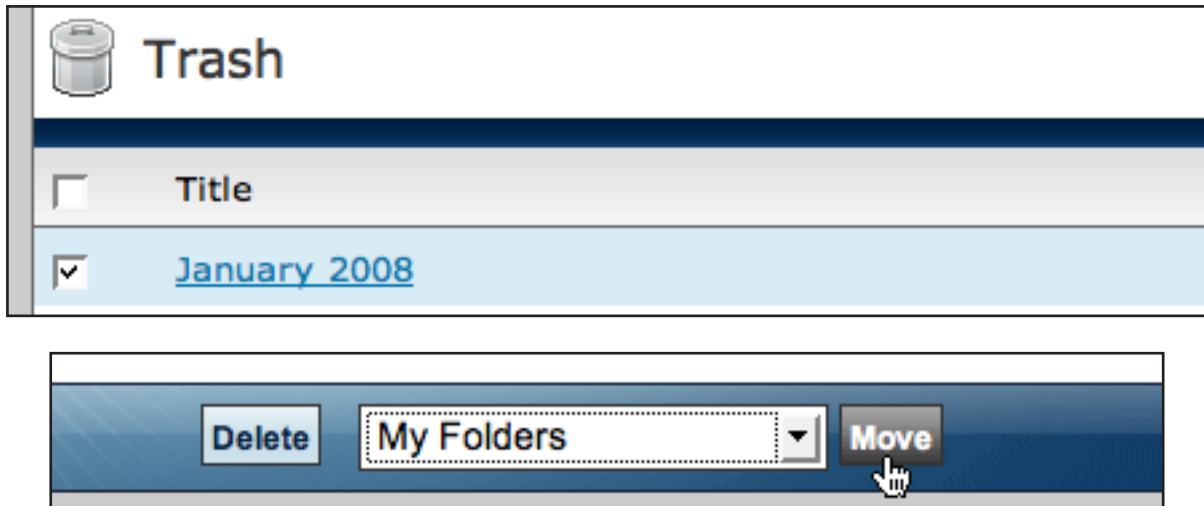

The screenshot shows a search bar with a text input field, a "Search" button, a "Trash" button, and a "Resubmit" button. A red oval highlights the text input field and the "Search" button.

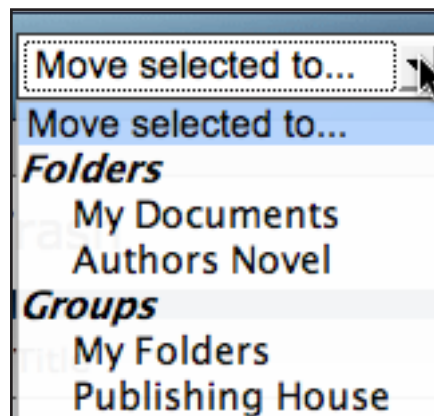

The search results will be displayed in the main content area.

Trash

The trash contains all folders or documents that have been deleted. Documents and Folders can be moved out of the trash by using the *Move selected to...* pull-down menu. Select the folder or document wished to be moved out of the trash by clicking into the checkbox next to the folder or document title. Select the folder or folder group destination from the *Move selected to...* pull-down menu and then click on the *Move* button.

Note: Documents can only be moved to folders and folders can only be moved to folder groups. The *Move selected to...* pull-down menu is divided into two sections Folders and Groups. Folders and Documents cannot be moved together they must be moved separately.

To permanently delete documents or folders from your iThenticate account, select which ones you would like to delete and click on the *Delete* button.

Note: Documents previously indexed into a custom repository will be removed from the custom repository when deleted from the Trash.

Settings

The settings tab on the main navigation allows you to customize your preferences for document and reports. To open the Settings page, click on the Settings link at the top of the screen.

The Settings page has three different tabs:

- **General** - is the default tab and handles general preferences, the home folder, number of documents shown at once in a folder, what screen is displayed after uploading a document, the timezone, and the default language. To adjust any of these options use the pull-down menus to select the available options.

A screenshot of the 'General' settings page. It contains several sections:

- Home Folder:** A dropdown menu with the text 'Select Home Folder'.
- Number of documents to show: *** A dropdown menu with the value '10'.
- After uploading a document: *** A section with a subtitle 'This changes which page you view after uploading a document'. It contains two radio button options: 'Display the upload folder' (which is selected) and 'Upload another document'.
- Timezone: *** A dropdown menu with the value 'America/Los_Angeles'.
- Language:** The text 'English' is displayed below the label.

The *After uploading a document* option controls which page is loaded after uploading a document, either the folder page or the upload a document screen.

Once the desired changes have been made click on the *Update Settings* button to save the changes.

- **Documents** - to open click on the Documents tab. It contains two customizable settings:

Document split size (pages): this option allows the user to break up a large document into smaller pieces by selecting how many pages a submission contains. This option helps make the Similarity Report more pertinent and easy to review. For example if a 50 page book was uploaded to iThenticate and Document split size was set to 50 and the Similarity Report found 3% of matching material, when in fact the actual amount was a whole page of the book, the Similarity Report would be misleading. If the split size was set to 10, five different Similarity Reports will be generated, four with 0% and the one Similarity Report that was generated containing the matching section will display a much higher percentage of matching material.

Default Document Sort: allows the user to change the default way to sort a document.

The screenshot shows a settings dialog with two dropdown menus. The first is labeled "Document split size (pages):" and is set to "10". The second is labeled "Default Document Sort:" and is set to "Document Title". At the bottom, there are two buttons: "Update Settings" and "Cancel".

- **Reports** - controls three report preferences: Email Notifications, Default Report View, and Color code report.

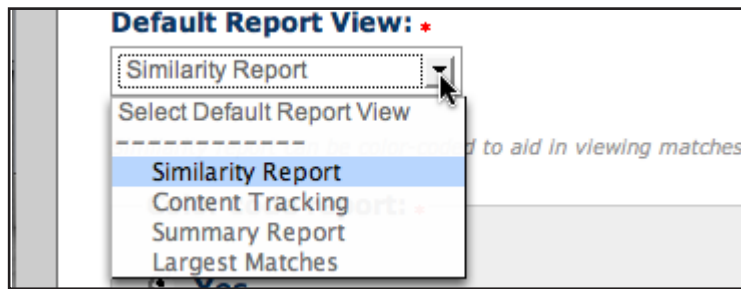

Email Notifications provides the user with the ability to allow emails sent to them if a Similarity Report exceeds a specified percentage of matching content within the iThenticate database. From the *Send report no frequently than:* pull-down menu, select an amount of time where a single email can be sent to the user's email address. From the Similarity Report Threshold and the Content Tracking Report Threshold pull-down menus, select a percentage value. When any report containing similar material to the iThenticate databases exceeds that percentage value you will be notified with an email.

The screenshot shows the "Email Notifications" settings panel. It contains the following text and controls:

- Use these settings to receive notification when a report has exceeded the specified thresholds below. You may set separate thresholds for the Similarity report and for the Content Tracking report. Email will only be sent when a report exceeds the thresholds you set below.
- Select how often reports, if any, are sent to you
- Send report no more frequently than:** *
Once a day
- Send notification when the Similarity score exceeds this percentage.
- Similarity Report Threshold:** *
don't notify me
- Send notification when at least one source matches over this percentage.
- Content Tracking Report Threshold:** *
don't notify me

Select the report view that will be the default report view when viewing a similarity report from the Default Report View pull-down menu.

Select whether or not the Similarity Reports are color coded, the default setting is that the reports are color coded.

The Report tab in the Settings page also informs the user which search indexes are currently available for documents to be compared against.

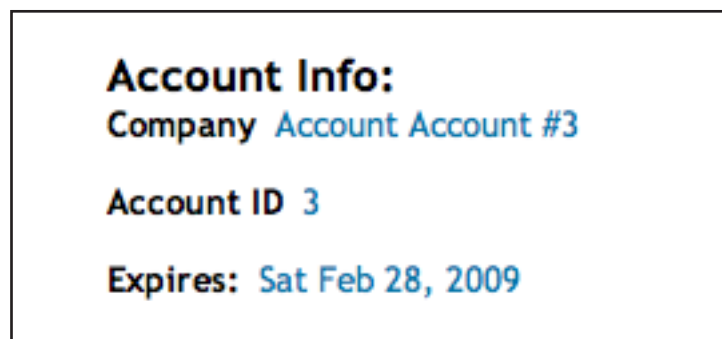

Account Info page

The account information can be updated, viewed or changed at any time within the Account Info page. This page contains the users profile, tracks the account usage which displays how many resubmissions, reports, and users are remaining within an account and also provide access to the account report filters and the API IP addressess. To access the Account Info page click on the Account Info link on the main navigation at the top of the iThenticate window.

The My Profile section of the Account Info page contains your iThenticate user information. Within this section the users name, email, and password can be changed. The user can also upload a picture for their account. To change your user name and email simply enter the new name or email in place of the former name or email and click on the *Update Profile* button below *My Profile*. Please view the **Changing your password** section of this manual to learn how to change your password.

The Account Info: section displays important information about the iThenticate account. This information contains the companies name, the Account ID, and the date the iThenticate account expires.

Filters

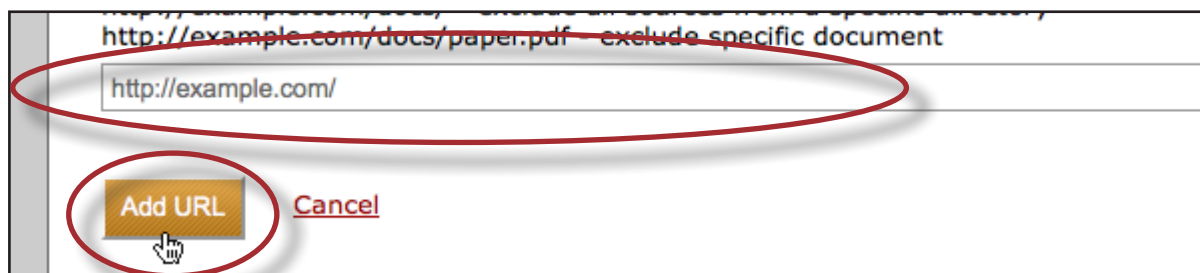

The *Filters* tab allows the user to control the URL Filters for an entire account. The Report Filters tab allows a user to manage a list of URLs that are filtered out of the matching content search when a report is being generated for all folders in an account. To add a URL to be filtered, click on the Filters tab.

When adding a URL, the URL may be as specific or general as you wish. Here are some examples:

- <http://example.com/> - exclude entire site (note trailing "/")
- <http://example.com/docs/> - exclude all sources from a specific directory
- <http://example.com/docs/paper.pdf> - exclude specific document

To add a URL, simply place it within the Add URL field and click on the Add URL button to add that URL to the report filters.

To remove a URL once it has been added to the Report Filters, click on the red x icon to the right of the URL's name.

API Access IP addresses

If you want access to the iThenticate API, you will need to contact your iThenticate account sales representative. If your account is enabled to allow API access, the API Access IP addresses option will appear within your *Account Info* page.

API Access IP addresses

Your account is enabled to allow API access. Use this entry to specify the IP address ranges that are allowed access. You may enter the special address 0.0.0.0 to allow access from any IP address.

Addresses may be entered as a single address or in "CIDR" format (e.g. 192.68.2.0/24). Multiple addresses may be entered by separating them with a space.

IP addresses: *

Within the *IP addresses* field, specify the IP address ranges that are allowed access to your account. You may enter the special address 0.0.0.0 to allow access from any IP address.

Addresses may be entered as a single address or in "CIDR" format (e.g. 192.68.2.0/24). Multiple addresses may be entered by separating them with a space. For information on how to begin using the iThenticate API, please view the **iThenticate API Guide**.

Phrase Exclusions

Phrase Exclusion can be applied at the account level. Adding phrases to the exclusion list follows the same process whether for an account or for a folder. To access the account phrase exclusion list first click on the *Account Info* tab and then click on the *Phrase Exclusions* Tab.

Once on the Exclusion list page follow the below steps to add phrases to the exclusion list:

Adding phrases to the exclusion list:	
1. Click on the <i>Add an new phrase</i> link	
2. Enter the phrase to be added to the list within the Phrase text: field	
3. Click the Create button to add the phrase to the list	
4. Repeat steps 2 and 3 for each phrase added to the exclusion list	
5. To go back to the exclusion list page click on the <i>Back to list</i> link	

Administrator Manual

This portion of the manual is for users who are account administrators. An account administrator has access to the *Manage Users* main navigation tab which specifically deals with managing users within an account, creating reporting groups, viewing usage reports, and controlling sharing between users.

The Manage Users navigation tab contains four content tabs: *Profiles*, *Groups*, *Reports*, and *Sharing*.

Profiles tab

The *Profiles* content tab allows account administrators to add new users, edit current user information, send activation emails to created users, deactivate or delete current users from the account.

Adding Users to an Account

Adding a new user	
1. Within the <i>Profiles</i> tab click on the <i>Add New User</i> link under the column Add Users	
2. Fill out the User Information form by giving the new user a first and last name, an email, a specific timezone, and a photo which is optional	
3. (Optional) Next fill out the Contact Information fields: <i>Phone #</i> and <i>Fax #</i>	
4. Decide whether or not this user will be able to submit documents or only be a reader of shared documents	

Adding a new user	
5. Decide whether or not this user can share folders with other users	
6. Decide whether or not to make this user an Account Administrator by clicking in the radio buttons for either Yes or No. Account Administrators have the ability to create and delete users	
7. Click the Create button to add the user to the iThenticate account	

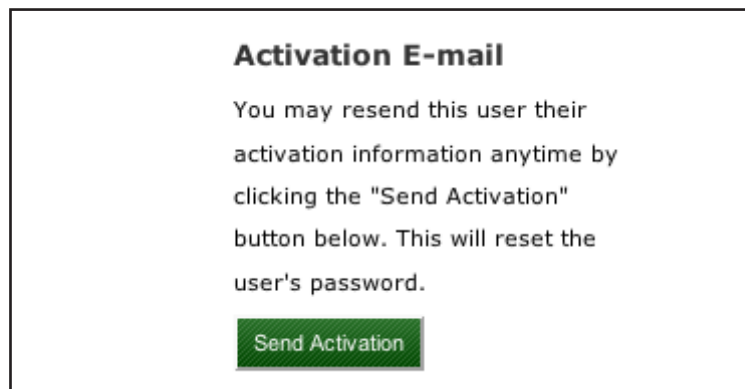

A list of users may be uploaded to an account if the administrator has multiple users to add to an account.

Uploading a user list	
1. Within the <i>Profiles</i> tab click on the <i>Upload User List</i> link under the column Add Users	
2. For an example of properly formatted user list files click on the <i>examples</i> link on the <i>Upload User List</i> page	
3. Click on the <i>Browse</i> button and locate the file containing the list of users on your computer. Click <i>Upload</i> to upload the list	
4. Once the file has been uploaded a list of the uploaded users will be displayed. Click on the <i>view profile</i> link to adjust the user settings for each user uploaded within the user list.	

When a user has been created an activation email is sent to them. If the account administrator needs to resend the activation email, click on the *Manage Users* link at the top of the page and then click on the *Edit* button to the right of the user who needs an activation email sent to them.

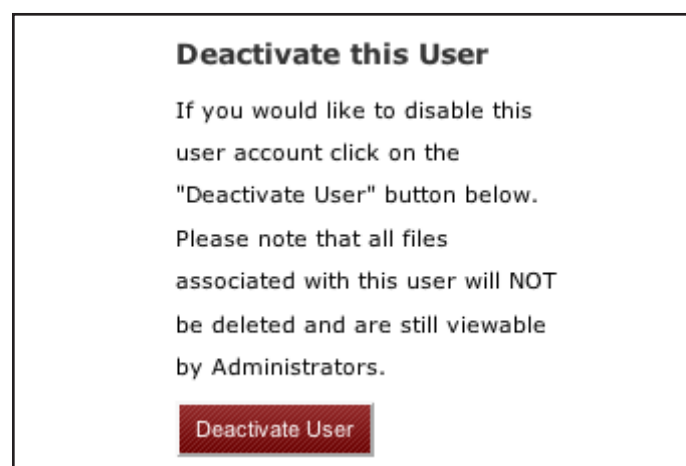

The Editing User Information page will open, to send the activation email click on the green *Send Activation* button.

Account administrators can edit user information from the Editing User Information page, by clicking on the *Edit* button. The Editing User Information page is identical to the Add New User page. If any information or settings have been changed click on the *Update* button to save the changes.

Deactivating a User

Only account administrators can deactivate a user from an account. To deactivate a user, click on the edit button to the right of the users name that is going to be deactivated. Within the Editing User Information page click on the *Deactivate User* button to deactivate this user.

 **Note:** All files associated with this user will NOT be deleted and are still viewable by administrators. Yet the deactivated user can no longer log in to the account.

Once a user has been deactivated they can then either be reactivated or deleted from the account completely. Reactivating the user allows the user to regain access to the account and all of their submitted documents and folders. To activate a user who has been deactivated click on the edit button next to the inactive users name on the *Manage Users* page. Then click on the *Activate User* button to reactivate the user.

Deleting a User

Only account administrators can delete a user from an account. To delete a user, click on the edit button to the right of the user's name that has been deactivated. Within the Editing User Information page click on the *Delete User* button to permanently delete this user from the account.

⚠ Once a user has been deleted all documents submitted by the user will no longer be accessible by the administrator or by shared users.

If the wrong user was accidentally deleted it can be undone by clicking on the undo link, that appears next to the iThenticate logo, immediately after deleting the user. If the user leaves the Manage Users page the deleted user cannot be undone.

Controlling a User's Abilities

A user's abilities can be edited at any time within a user's profile by clicking on the Edit button to the right of the user's name.

The administrator can toggle three options for each user: Can this user submit documents?, Can this user share folders?, and will this user be an Account Administrator?

A form with three sections, each containing radio button options. The first section is titled 'Can this user submit documents?: *' and has 'Yes' selected. The second section is titled 'Can this user share folders?: *' and has 'No' selected, with the radio button circled in red. The third section is titled 'Account Administrator?: *' and has 'No' selected. At the bottom left, there is a yellow 'Update' button circled in red, and a red 'Cancel' link to its right.

For example, if a user should be restricted from sharing their folders, click on the *No* radio button for the *Can this user share folders?* option. To save any changes made to the user profile, click the *Update* button.

Searching for a User

If an account has many users it may be quicker to search for a specific user using the search field. To find a user within the user list, enter the user's name into the search field and click the *Search* button.

Groups Tab

The Groups tab allows the administrator of the account to create user groups and add users to the groups from their user profile. This feature allows the administrator to group users and track the usage statistics of these users within their group when viewing the *Reports* tab section of the *Manage Users* page.

To add a new group, enter a name for the new group in the *Add New Group:* field and click on the *Add Report Group* button to add the group.

Once a group has been created, you can start adding users to the group. To add a user to a group, click on the *Profiles* tab within the *Manage Users* page. Next to the user's name click on the *edit* button. Within the user's profile use the *Reporting Group* pull-down menu to select which group you want to place the user in. If a user has not been placed in a group they will be assigned with the *Group: Unassigned* within the *Reports* tab.

If you would like to delete a reporting group from your account, simply click on the red X icon to the right of the group name. A prompt will open asking you if you want to remove the group, click OK to delete the group.

To change the name of a group, click on the group's name.

Within the Update Group Name field change the group's name and click on the Update Group Name button to save the new group name.

 A screenshot of a dialog box titled "Update Group Name: *". It contains a text input field with the text "Cost Center B". Below the input field are two buttons: a yellow "Update Group Name" button and a red "Cancel" button. A hand cursor is pointing at the "Update Group Name" button.

Reports Tab

The *Reports* content tab contains statistics for the overall account, reporting groups, and for the individual users of the account. To view the *Usage Reports* page click on the Reports tab. The *Usage Reports* page keeps track of document submissions made by users in reporting groups and the accumulated page count for all submissions within each group and for the entire account. There are three tabs within the Reports tab in which to view usage statistics: By User/Group, By Month, and Set Date Range. These options help an administrator search for specific or general usage statistics.

 A screenshot of the "Manage Users" interface. At the top, there are tabs for "Profiles", "Group", "Reports", and "Sharing". The "Reports" tab is selected and circled in red. Below the tabs, there are sub-tabs for "By User / Group", "By Month", and "Set Date Range". The main content area is titled "Usage Reports" and contains a table of usage statistics.

User	Group ↓	Submissions	Page count ¹
+ Group: Online Content		500	257
+ Group: Print Ads		190	512
+ Group: Unassigned		683	3,635
iParadigms Account		1,373	4,404

Click on a group name to view more detailed usage statistics for the users in that group. To get the *Individual Usage Report* click on a user's name within a group to open a page that displays document submissions and page count per month and a total of all submissions made by this user.

Matt R. - Usage Report		
Report is not limited by a date range change		
Month ↓	Submissions	Page count ¹
April - 08	22	79
May - 08	8	43
Total	30	122

The account administrator can also view the *Company Usage Report* by clicking on the account name in golden text. The *Company Usage Report* displays a month by month usage report of all the submissions by the account users. You can also click on the *By Month* tab to access the month by month account usage report.

User	Group ↓	Submissions	Page count ¹
+ Group: Online Content		500	257
+ Group: Print Ads		190	512
+ Group: Unassigned		683	3,635
iParadigms Account		1,373	4,404

To view the account usage for a specific date range click on the *Set Date Range* link.

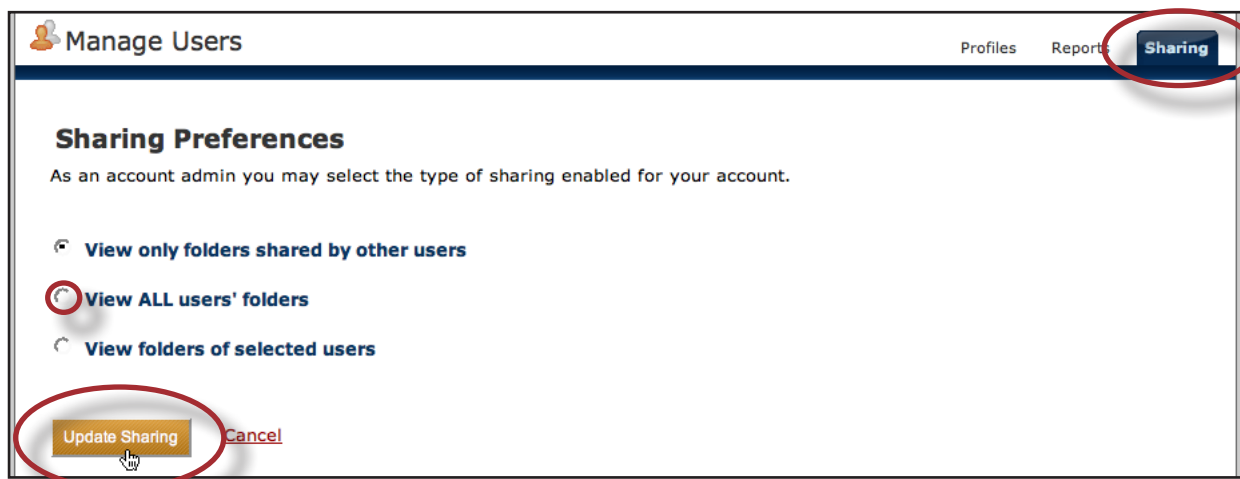

Enter a date in the Date fields (the format is 2008-10-22) or click on the calendar icon to the right of the Start and Due Date field to select a date. Once the start and due dates have been selected click on the Update Date Range button.

The date range selected restricts the account usage report within the date range and will retrieve all the groups with users who have made submissions within the date range.

Sharing Tab

The *Sharing* content tab contains three different types of sharing enabled for your account: *View only folders shared by other users*, *View ALL users' folders*, and *View folders of selected users*. The default is *View only folders shared by other users*. To change the sharing type for the account, click on the radio button next to the sharing type and click on the *Update Sharing* button.

If the *View folders of selected users* has been selected, the account administrator must first select which user's folders will be shared within the account. To select a user, click in the check box next to their name to place a check. This user's folders will now be shared within the account. To apply the changes made, click on the *Update Sharing* button.

Note: You can enable/disable the ability of a non-administrator user to share folders, for more information please click [here](#).

Email Tab

Administrators can add a customized message to the welcome email that is sent to new users added to the account. To add a message to the welcome email, first navigate to the Email tab.

To change the email subject, adjust the message accordingly in the *Custom Email Subject* field.

To add a custom message simply type the message into the *Custom Message* text box.

If supplied, this will replace the standard "Account Created" subject

Custom Email Subject:

This text will be added to the standard welcome email message your users receive.

Custom Message :

Click on the *Set Custom Message* button to save any changes. After clicking on the *Set Custom Message* button the *Example Welcome Email Message* will update with the text changes providing a preview of the welcome email.

Example "Welcome" Email Message

```
To: "Your User" <user@example.com>
From: "Mark Rickson" <mricksen@iparadigms.com>
Subject: iThenticate Account Created

Please make sure when you submit documents to select the correct
reporting group.
```

Appendix A - Manual Changes

June 5, 2009

- Updated manual to reflect new changes to iThenticate homepage
- Separated manage users tab section into an administrator manual to clarify the account administrators capabilities. Added an additional section, Controlling a User's Abilities, to display new feature where administrators may control a user's ability to share documents

May 18, 2009

- Added the upload user list feature on page 42 of the Manage Users section

October 28, 2008

- Added the new feature, Report filters, within the Settings Tab section on page 29 and the Account Info section on page 39. The report filters allows a user to manage a list of URLs that are filtered out of the matching content search when a report is being generated for submitted documents.
- Added the Groups tab feature to the Manage Users section of the manual found on page 44. The Groups feature allows the administrator of the account to create groups and add users to them to better organize the Account Usage Statistics within the Reports tab.
- In the Reports tab section of the Manage Users section the *By User/Group*, *By Month*, and *Set Date Range* report usage options have been added. On page 45-6.

September 25, 2008

- A new option "Can this user submit documents?" has been added to the *adding a new user* table on page 40. This feature allows the administrator of the account to decide if they want the new user to have the ability to submit documents or if they just want the user to be a reader of shared documents. This option can be toggled at any time by the administrator, once a user has been created, by clicking on the edit button to the right of the user's name, in the Profiles section of the Manage Users page.

September 16, 2008

- Added new features to the Manage Users section of the manual. These features include: deactivating a user, reactivating a user, the Reports tab, and the Sharing tab. The Manage Users tab in iThenticate is accessible only by administrator users.
- An appendix section has been added to the manual to track changes made to the manual.

Glossary

Definitions

account administrator - an account administrator (referred to as the account admin) has access to the manage users tab on the iThenticate homepage

content tabs - contain the different pages of the main navigation tabs. For example, the Settings page has three content tabs: General, Documents, and Reports.

content tracking mode - the content tracking similarity report view mode lists all the matches between the iThenticate databases and the submitted document.

directory - the area of the Folders page that contains the folder groups and Trash

document - submissions to iThenticate are called documents. Documents can be uploaded in four ways: Upload a File, Zip File Upload, Drag & Drop Upload, and Cut & Paste.

info/action column - contains easy access to iThenticate actions and information. The only pages that have action functionality are the Folders page and Manage Users page. For example in the Manage Users page the Info/Action Column contains the action *Add New User* and *Upgrade Your Account* information.

folder - where documents are submitted to. Folders are created within a folder group.

folder group - contains folders. Folder groups can only be deleted if they contain no folders.

folder tabs - there are four folder tabs: Documents, Sharing, and Settings. Each tab provides different functionality. If the user is not enabled to share the Sharing tab is not displayed

largest matches - the report shows the percentage of words that are a part of a matching string of words (with some limited flexibility), in the Content Tracking view the report shows the percentage of matching words for a source regardless of whether or not the words are pieces of matching strings. In some cases, strings from the same source may overlap, in which case, the longer string in the Largest Match view will be displayed.

main content - displays the different iThenticate pages

main navigation - the main navigation bar at the top of the screen has three to five different tabs based on the user type. These different tabs are: Folders, Settings, Account Info and Manage Users. Only account administrators has access the Manage Users tab.

one-time password - a password given to either a new user or to a user who has forgotten their password. iThenticate will send you a one-time password to your email. You may only log in once with this password and you will need to change it the first time you log in.

Overall Similarity Index - this index determines the percentage of similarity between a submission and information existing in the iThenticate databases selected as search targets.

secret question and answer - the secret question and answer set allows a user to reset their password immediately through the *Forgot your Password?* link on the iThenticate website. The secret question is selected from a list during user profile creation, and the user enters an answer. The answer is case sensitive and may or may not include spacing. Different capitalization or spacing when answering the secret question will result in rejection of the password reset attempt.

sharing - folders can be shared with other users within your account. The sharing tab within a folder, shows you all the users who you can share the folder with. If a folder is shared with another user, that user can only view the Similarity Reports

similarity report - this is the default viewing mode for the Similarity Report. Provides a list of all areas of the paper which have similarity to information in the Turnitin database. Matches are color coded and listed from highest to lowest percentage of matching word area within the submission. Only the top or best matches are shown, all underlying matches are visible in the Content Tracking viewing mode. By clicking on the highlighted area of the text, the matching sources displays the actual source from the website and which part of the original writing was matched with the submitted document

summary report - a simple, printable list of the matches found followed by the paper with the matching areas highlighted

toolbar - The toolbar changes

functionality based on what the main content is displaying. For example the toolbar displays the *Search, Trash, and Move* functions when the user is browsing documents from within a folder. The toolbar is only functional when the user is within the Folder page

user profile - contains the users information. Such as, first and last name and email address.
